

2010 Integral Safety Assessment Survey **Why should I take the ISA?**

Richmond Refinery

In 2008 over 600 Chevron Employees and Contract Partners completed the ISA. Those responses were analyzed and used to shape many of our Incident and Injury Free activities at the refinery. Since 2008, the Incident and Injury Free leadership team developed engagement activities to:

- **Improve the Use and Belief in Stop Work Authority** (ex. Safety Topic of the Month, 5 Steps of Stop Work Authority, Stop Work Authority Continuum, Stop Work Authority Survey during the Business Plan Rollout)
- **Increase our competency in Risk Recognition and Hazard Identification.** (ex. Loss Prevention Week activities, 3Q Proactive Event, LPSA stewardship, Hazard ID Tool rollout)
- **Engage first and second line supervisors in the conversation of how to balance business drivers and living Incident and Injury Free** (ex. LPS in an IIF World, 3Q Supervisor and Manager engagement topics)

The activities build our capabilities and our commitment to living Incident and Injury Free. We want to hear from you. The ISA is a great way to share your thoughts about IIF at Richmond. Please take 20 minutes to complete the ISA survey. Results will be shared with the refinery after they have been analyzed by JMJ Associates.
